PART 1

RESEARCH AND STRATEGY

What Is Telecommunications?

“The telecom industry reaches into every corner of our economies, societies, and private lives, and it is one of the greatest drivers of economic growth and human equality the world has ever seen.”

(Borje Ekholm, CEO Ericsson)

Telecommunication Branches

```
graph TD; Root[Telecommunication Branches] --- B1[Telephone, Television & Radio]; Root --- B2[Cellular Networks]; Root --- B3[Optical Communications]; Root --- B4[Internet & Satellite];
```

Telephone, Television & Radio

Telephones use analog and digital tech for voice communication, while radio and TV broadcast audio/visual content via broadcasting and satellites

(Electronics Forum, 2023).

Optical Communications

Transmits data via light through fiber optic cables or lasers, enabling high-speed, long-distance communication using glass or plastic fibers.

(Electronics Forum, 2023).

Cellular Networks

Small geographic cells send and receive signals, allowing internet and calling on devices without WiFi

(Electronics Forum, 2023).

Internet & Satellite

Global computer network with Wi-Fi enables internet access. Broadband offers high speeds. Satellites use orbiting satellites, dishes, and antennas for remote areas

(Electronics Forum, 2023).

Cellular Network Market In The UK

The United Kingdom has one of the world's major telecommunications marketplaces. The availability of telecom infrastructure is regarded as critical because it underpins most of the United Kingdom's economic and social activity.

The **most valuable telecommunications brand** in the United Kingdom (UK) from **2020 to 2022** was **Vodafone**, with a brand value of roughly **19.5 billion U.S. dollars** in 2022.

The second most valuable telecom company in the UK during that same time period was Sky, followed by Three, O2 and BT.

(Petroc Taylor, Jan 18, 2023)

Main Challenges Identified in UK Telecom Market

1

Despite high penetration, household spending on mobile services has fallen sharply in recent years due to shifting consumption habits.

(Petroc Taylor, Oct 18, 2023)

2

Low quality digital customer experience.

(Flyaps Product Development Blog, 2023)

So Why Did The Market

FAIL

INFLATION

Despite record high UK inflation, the impact on the telecoms sector has been minimal, contributing only 0.7% to the overall inflation in the market.

(ofcom, 2022)

BREXIT

After Brexit, UK networks discontinued inclusive EU roaming, now charging £2/day for it.

(ofcom, 2022)

PESTLE ANALYSIS

POLITICAL

- UK Telecom Regulations.
- EU Common Regulatory Framework.
- Brexit.
- Cross Border Services.

ECONOMICAL

- High purchasing power.
- Tech sector expansion in England.
- Rising cost and slowed revenue growth.
- Interest rates, inflation and taxes.

SOCIAL

- Reduced household spending on mobile services.
- 21.3% of rural population giving opportunities for horizontal growth (TMQ, 2022).
- 96.6% of households expected to have internet access.

TECHNOLOGICAL

- 5G technology introduction in telecom market.
- Installing fibre networks.
- Utilising AI.
- Strong system to prevent data breach.

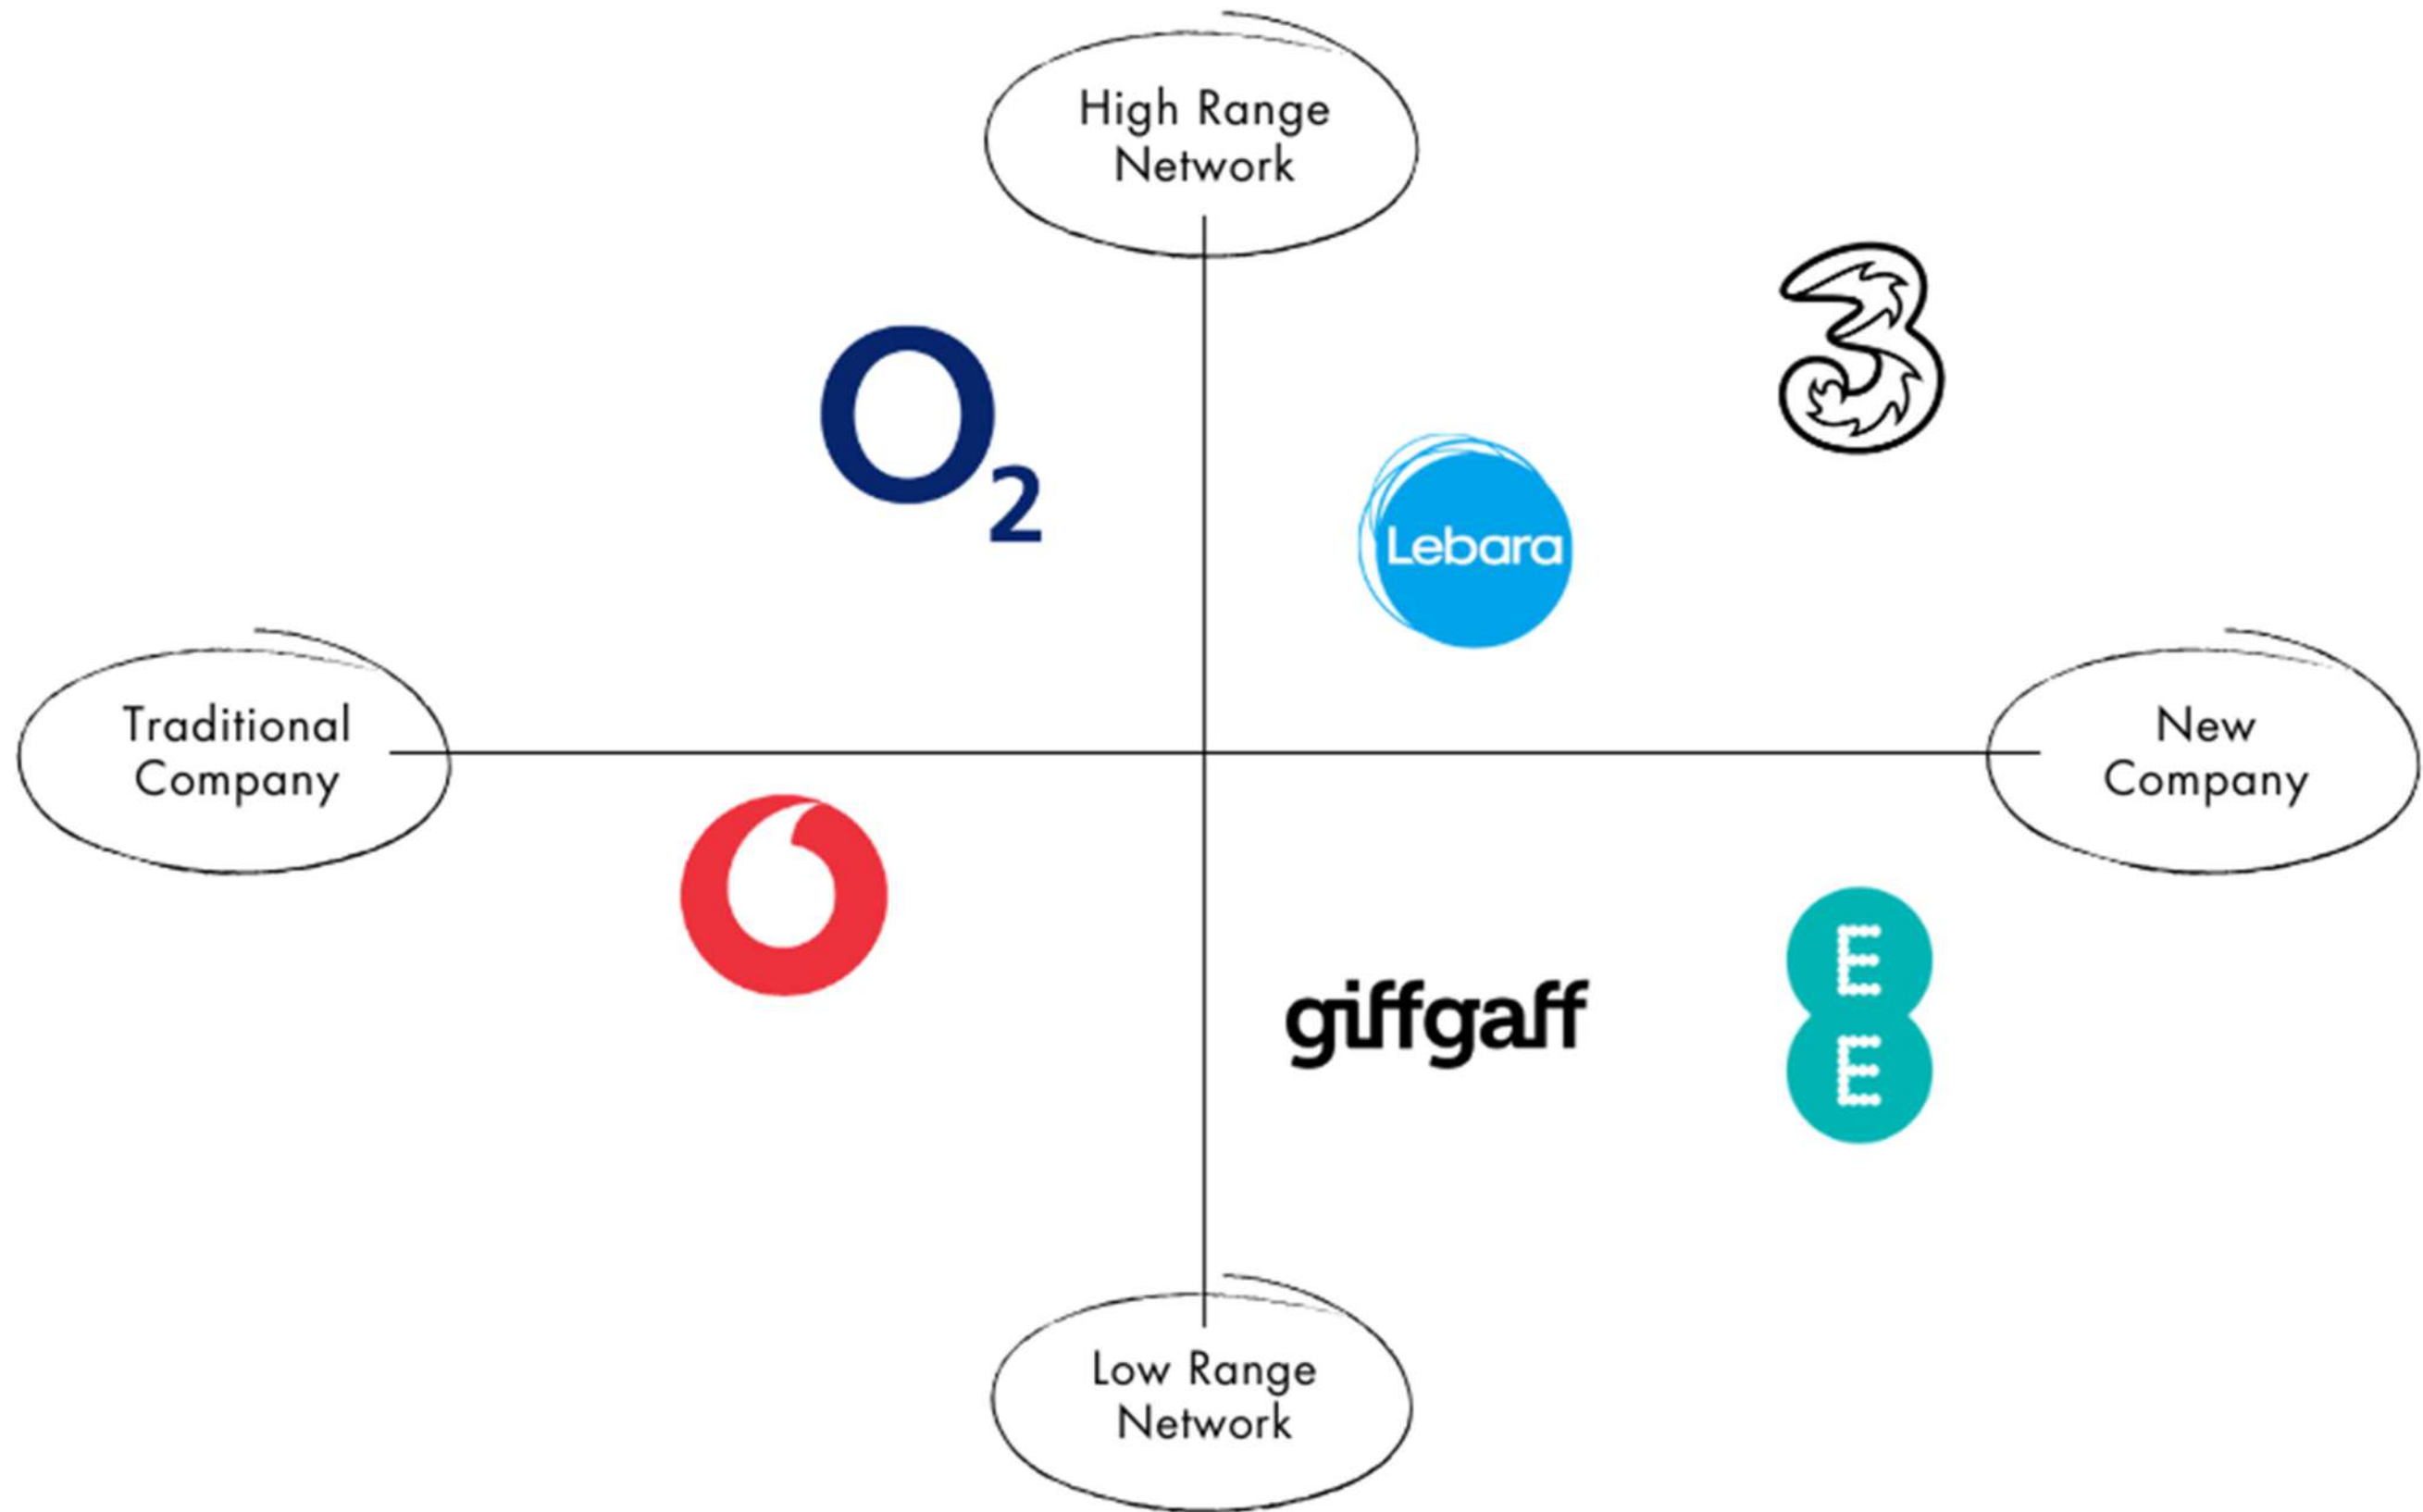

LEGAL

- Standardised service market to ensure basic access to telephone services.
- Ofcom may impose access requirements on ECNs for better internet.

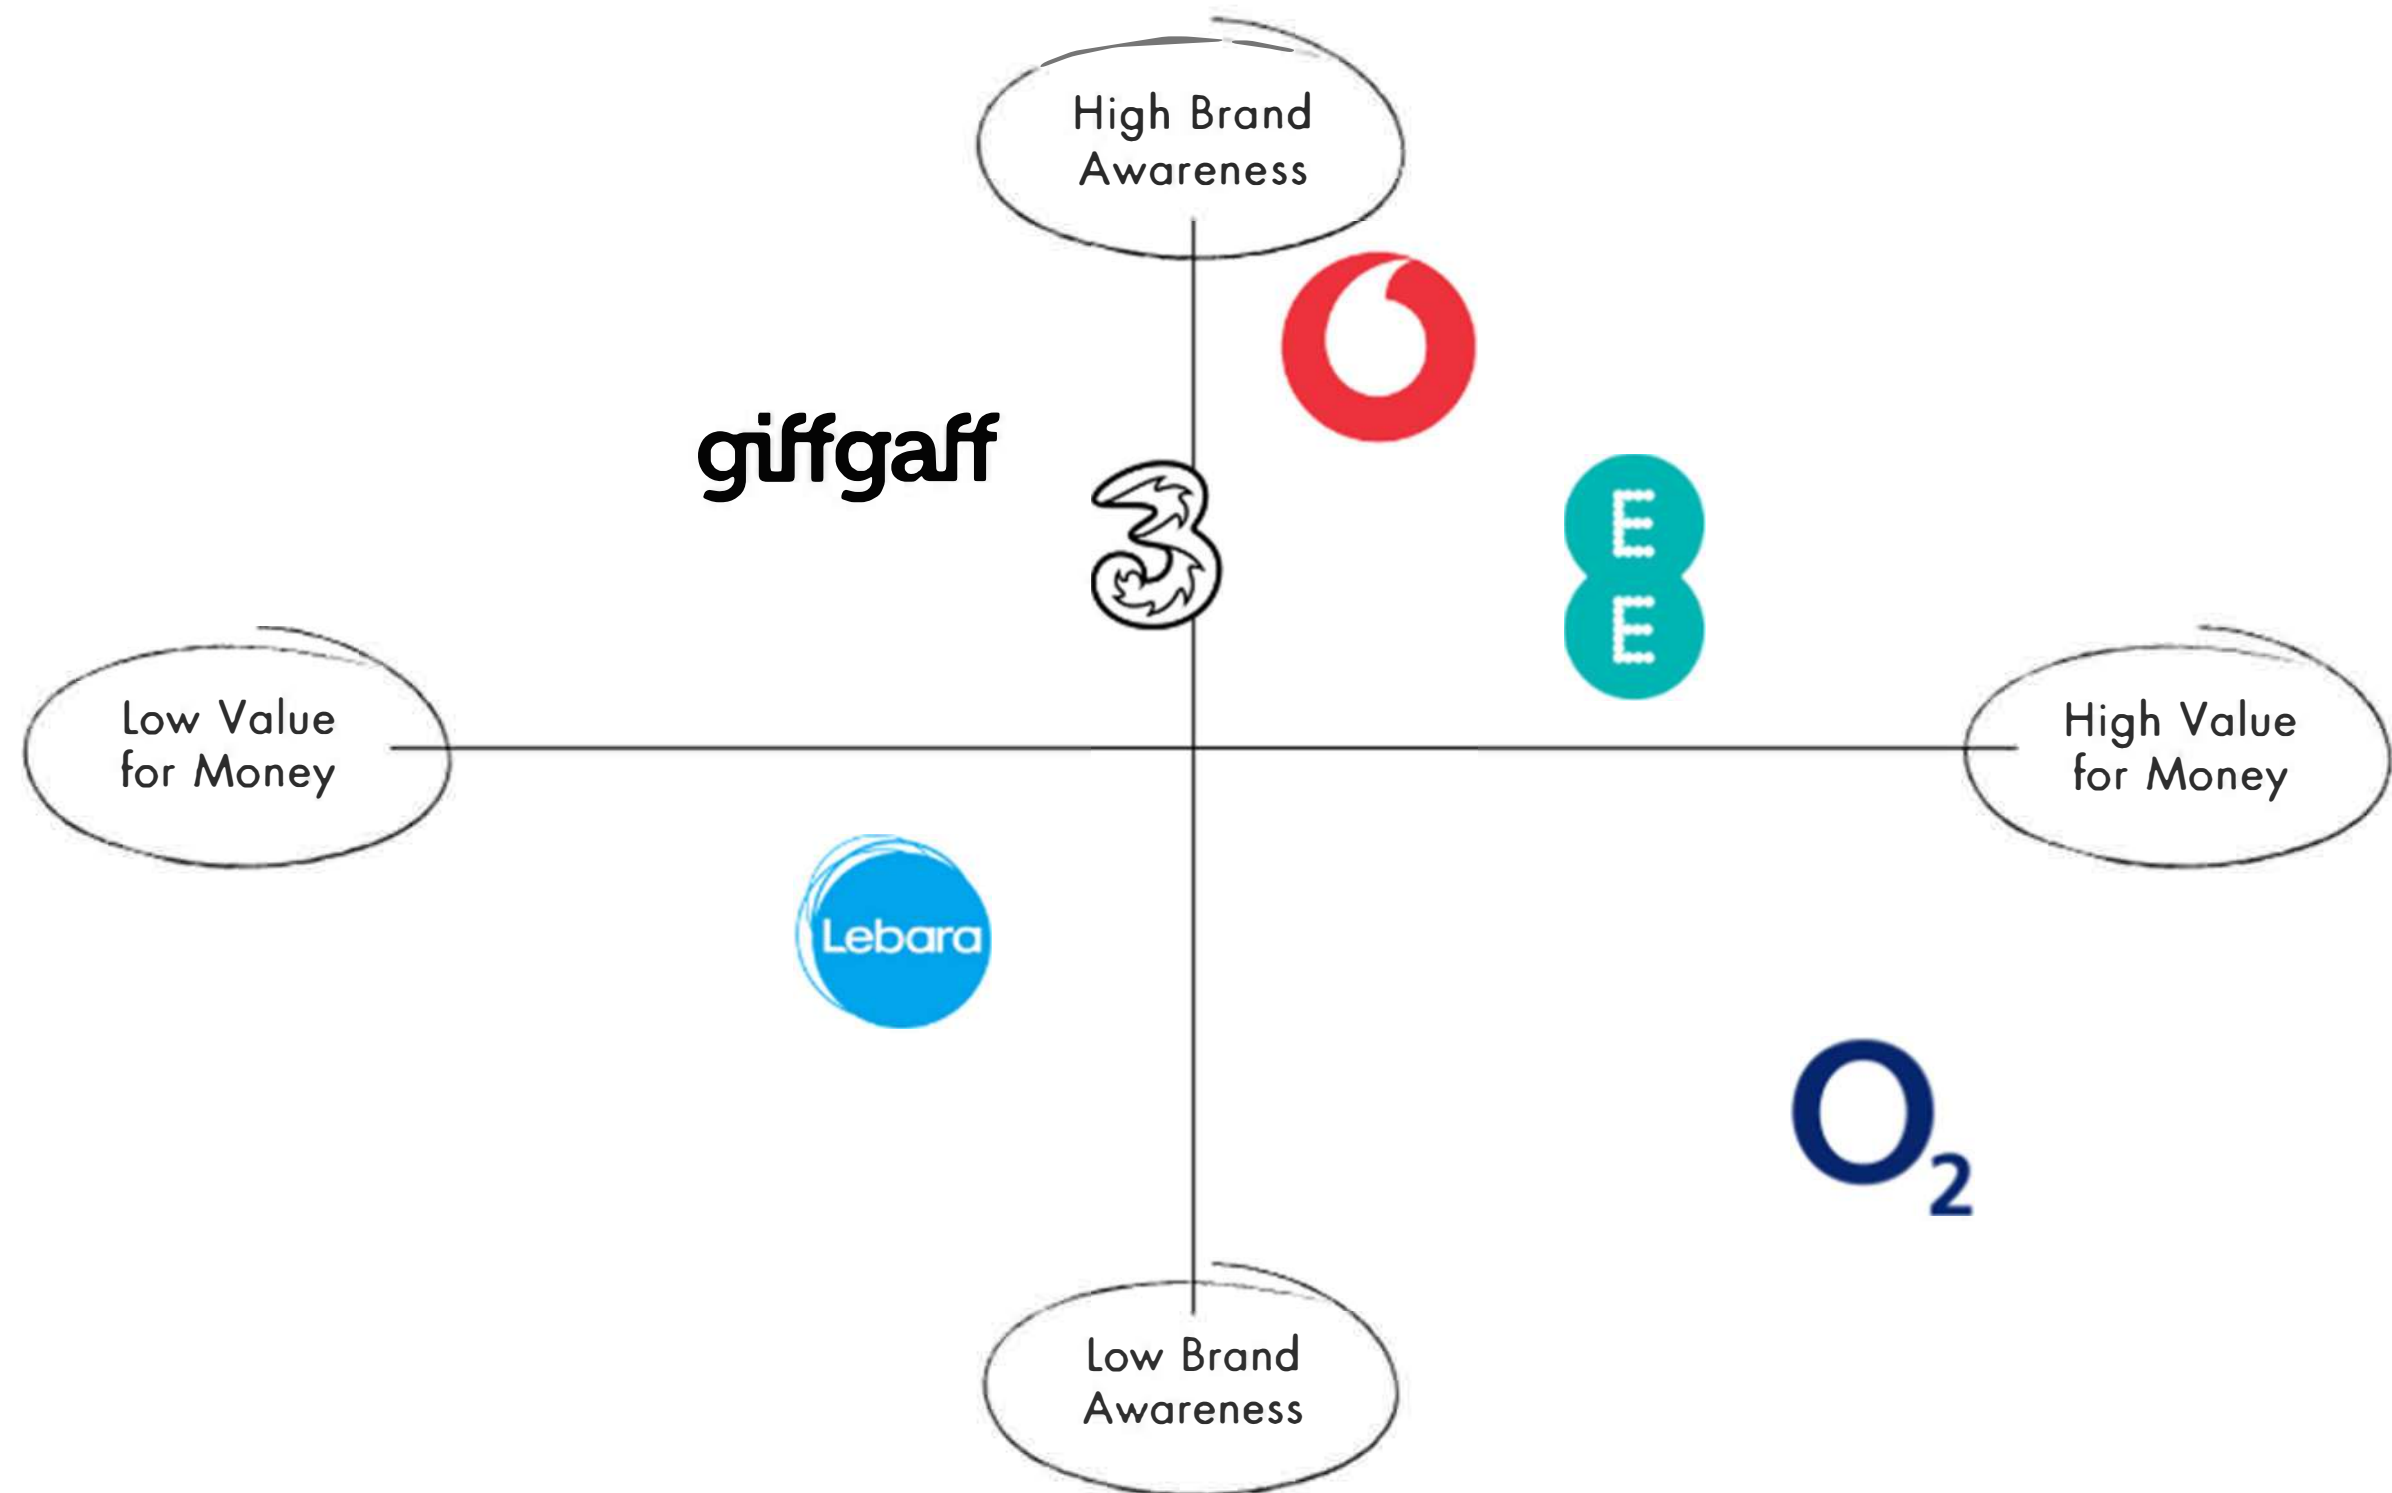

ENVIRONMENTAL

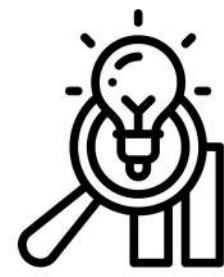

- In 2020, the telecom industry contributed 2.6% of global CO2 emissions (ETNO, 2021)
- Rise in energy costs and connectivity leading major operations to explore renewable energy partnerships (ETNO, 2021).

CATEGORY MAPPING

CATEGORY MAPPING

INSIGHTS

In the market, number of **new brands** have **increased dramatically**.

To survive in this cutthroat market, businesses are providing **extra benefits to draw in and keep clients**.

Because of the intense rivalry, there is a significant amount of **lack of awareness** about some brands.

Hence, companies are improving their network coverage by the **5G network's rapid expansion**.

OPPORTUNITIES

Telecom newcomers can offer innovative, **customer-centric solutions**.

Customer Focus: To thrive, priorities **personalized services** for brand loyalty.

Boosting Visibility: Invest in digital and targeted marketing to combat awareness issues.

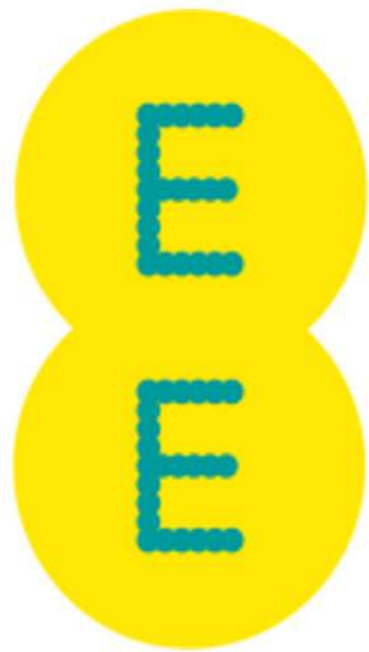

Niche Expertise: Explore specialized services to stand out in specific markets.

SEMIOTIC ANALYSIS

We started by researching three shortlisted brands from the telecommunications sector and digging deep into their brand identities.

- 1. EE**
- 2. VODAFONE**
- 3. O2**

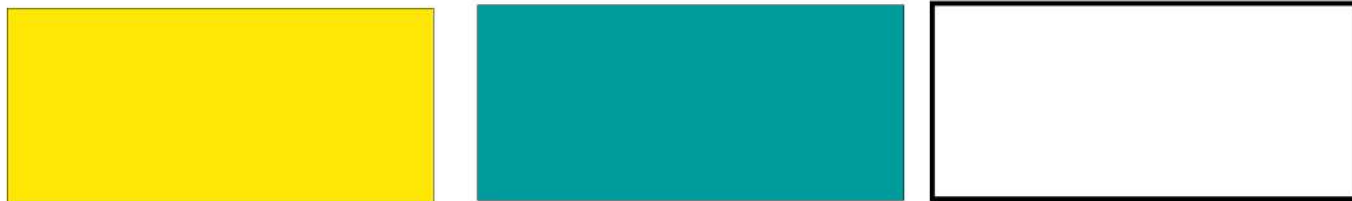

Shape/Logo

The emergence of new
technologies

The background features a hand pointing towards a central target icon with an arrow in the bullseye. This target is part of a network diagram consisting of several circular nodes, each containing a user icon, connected by dashed lines. The overall aesthetic is high-tech and digital, with a dark blue and black color palette and glowing light effects.

STRATEGIC OBJECTIVE

To expand the customer base by raising awareness of the exceptional advantages associated with O2 mobile data services.

Concept Board 1

“Together, Everywhere”

Aim

O2 is a telecommunications brand in UK that has comparatively higher priced plans. Everyone is aware of this fact. But due to the lack of awareness of the services the brand provides, it's not usually preferred by the younger generations, namely the Gen-Z. Our aim is to create brand service awareness in order to attract more young customers.

Overview

O2 as a brand gives multiple features that can help an individual in their day-to-day lives, irrespective of their profession. Through this campaign, we'll try to reinforce the idea of O2 being there for everyone at all places (indirectly also claiming that it has the best network coverage).

Concept Board 2

Join O2, Inhale Rewards.

Aim

Aims to demonstrate how joining to an O2 mobile data connection will unlock benefits of airtime rewards, early access to shows, concerts, no roaming charges while travelling to EU and hassle free connectivity

Overview

This concept will demonstrate how O2 can become a consumer's long-term trusted partner by providing them benefits and rewards, create value for their money while providing seamless internet connection.

Concept Board 3

"The Breath of Life"

Aim

Aims to demonstrate how O2 can be crucial role in telecommunication industry, convincing potential customers that O2'5G is trustworthy and exists in every corner of users' lives

Overview

This concept will demonstrate how O2 is connected with people's lives and uses technological advancements and personalized services to create better value for people. Promoting customer trust in O2.

Concept Board 4

"The Power of Development"

Aim

Among different enterprises, competition and cooperation relationships are often influenced by information asymmetry, potentially giving rise to conflicts. O2's objective is to establish a continuously strengthening business alliance with partner companies, leveraging O2's services to foster information exchange, diminish uncertainty, and facilitate more efficient cooperation.

Overview

At O2, we proactively seek to forge strategic partnerships with formidable enterprises. These collaborations are instrumental in extending our brand's reach, bolstered by advanced technical support and reliable assurances. Additionally, we are dedicated to cultivating an expansive business network that facilitates collaboration among diverse enterprises, with the ultimate aim of achieving mutually beneficial objectives.

Concept Board 5

*“Let everyone experience the fun of
O2”*

Aim

In remote and poor areas, many people do not enjoy the fun of technology, O2's vision is to make more economically underdeveloped areas can easily use O2 products and services.

Overview

As a world-class Internet communication operator, O2's latest marketing concept is to allow everyone in the world to enjoy the convenience of technology for everyone, the price covers the full range of people, and the real benefit of all mankind.

A tall telecommunications tower with many satellite dishes, set against a night cityscape background. The tower is the central focus, with its structure and dishes clearly visible. The background shows a city at night with lights and a dark sky.

PART 2

EFFECTIVE CREATIVE COMMUNICATION

RESEARCH FINDINGS

KEY INSIGHTS

- The market competition for telecom companies have increased significantly.
- Political and social factors have caused more and more people to rely on broadband for internet.
- Data plans with additional perks appeal the most to consumers.

OPPORTUNITIES

O2 as a telecom brand has millennials as the largest consumer audience. The additional perks provided by O2 with the data plans however are more appealing to the Gen-Z.

Since we already have a dominant place in the market in terms of network, customer support and extra features; we can use creative, unique and fun approaches to market these features.

STRATEGIC OBJECTIVE

- Increase brand awareness of the company and aim for targeted consumer base expansion.
- Market it's products to the right audience (younger generations).

CREATIVE CONCEPT AND RATIONALE

Creative Concept

TOGETHER, EVERYWHERE

- O2 is a comparatively higher priced mobile network, but also the most beneficial.
- We need to reinforce the idea of cost-efficient mobile plans, thus increasing brand awareness of the company amongst Gen-Z.
- Communicate to the consumers how in every stage of their day to day life, O2 will be there to make it easier and more efficient for them.

Rationale - How is O2 a better choice for consumers?

- Fastest and most widespread 5G network in the UK.
- All plans come with additional perks .
- Access to everything with a single plan.

BRIEF

BACKGROUND

Telecommunication industry provides high speed internet, data services and products to customers to foster mutually beneficial long-term relationships

CHALLENGE

Provide relevantly targeted advertisements to increase brand awareness and expand the customer base. Create demand for cellular network plans amongst the millennials and gen-z.

After COVID-19, consumers do not want to switch to cellular data after having fixed broadband services at home. Inflation and Brexit have also significantly caused the lack of demand.

PROBLEM

TARGET AUDIENCE

AGE: 16-30 years (Gen-Z and Millennials)

GENDER: Male/Female

WHO: University Students and Newly Working Professionals.

INTERESTS: Social Media, Internet Browsing, Retail Content, Extra Benefits.

TONE OF VOICE: Fun, Curious.

PROJECT EVALUATION

Summary

Telecommunication network has revolutionized the age of Internet. With the speed and technology advancement of telecom and cellular network, there will be advancements in all sectors of technology, entertainment, Artificial intelligence and cyber security. People want fast network and high-speed internet everywhere and anywhere. With cellular data plans, people can access information even outside the wi-fi zones. Texts, calls, and work is made simpler with cellular data plans, and It's efficient in UK market because it underpins its social and economic activity.

Conclusion

Therefore, with our thorough research, we found the opportunities to market o2 against its other competitors with the help of our market insights and analysis. We focused our visual advertisements and copy campaigns to catapult the young generation's attention to buy O2 cellular network by tackling lack of awareness of the benefits of cellular network and highlighting its features and long-term benefits. The cellular network would go beyond UK as well with their free roaming inclusive zones. These campaigns showcased people that it can be more efficient than broadband and reduce hesitance around buying cellular data plans monthly or annually.
